SOCIAL MEDIA VS PRODUCTIVITY

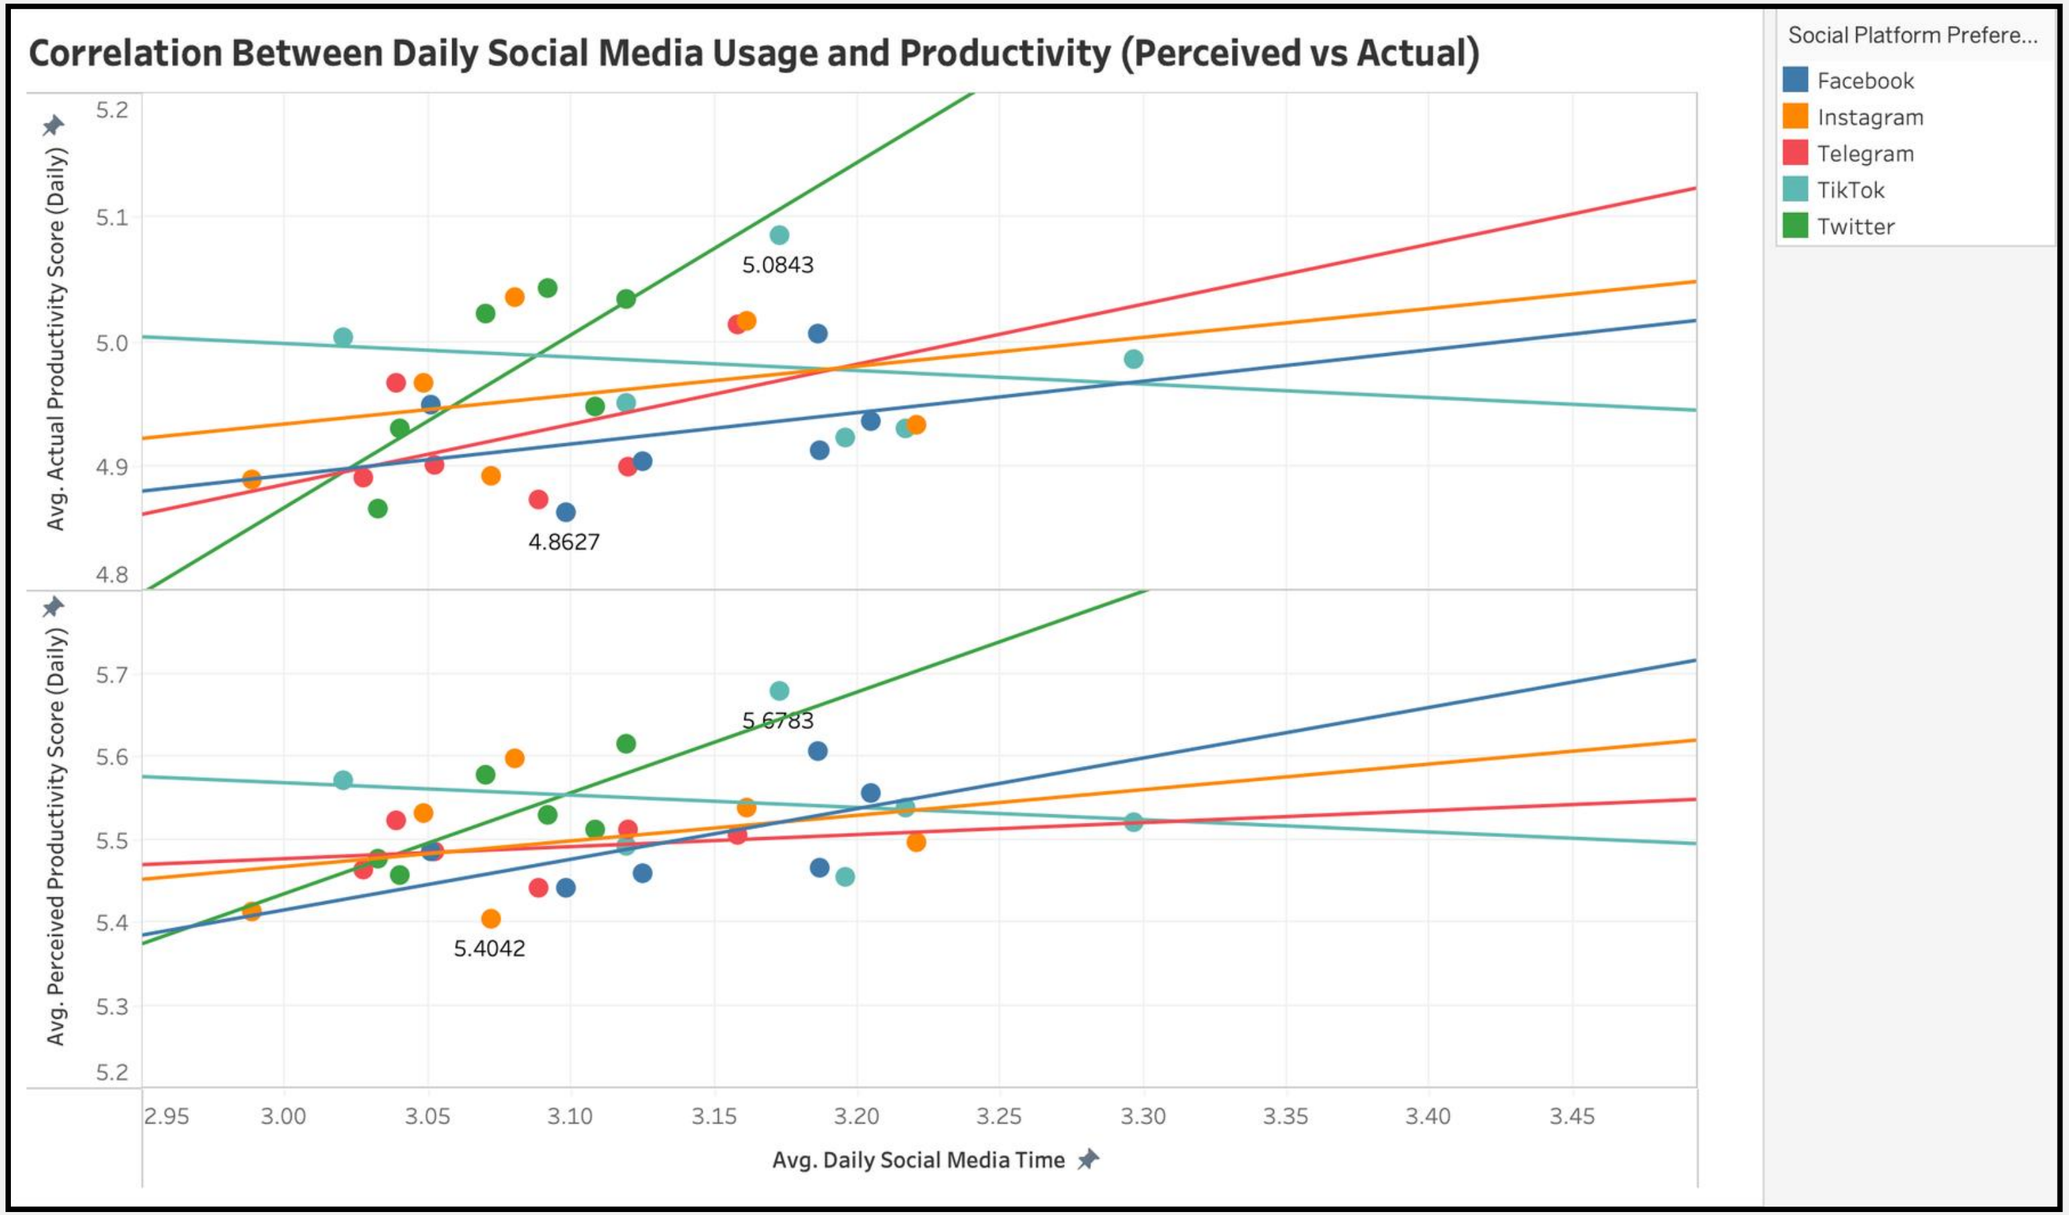

IS SOCIAL MEDIA REALLY THE PROBLEM?

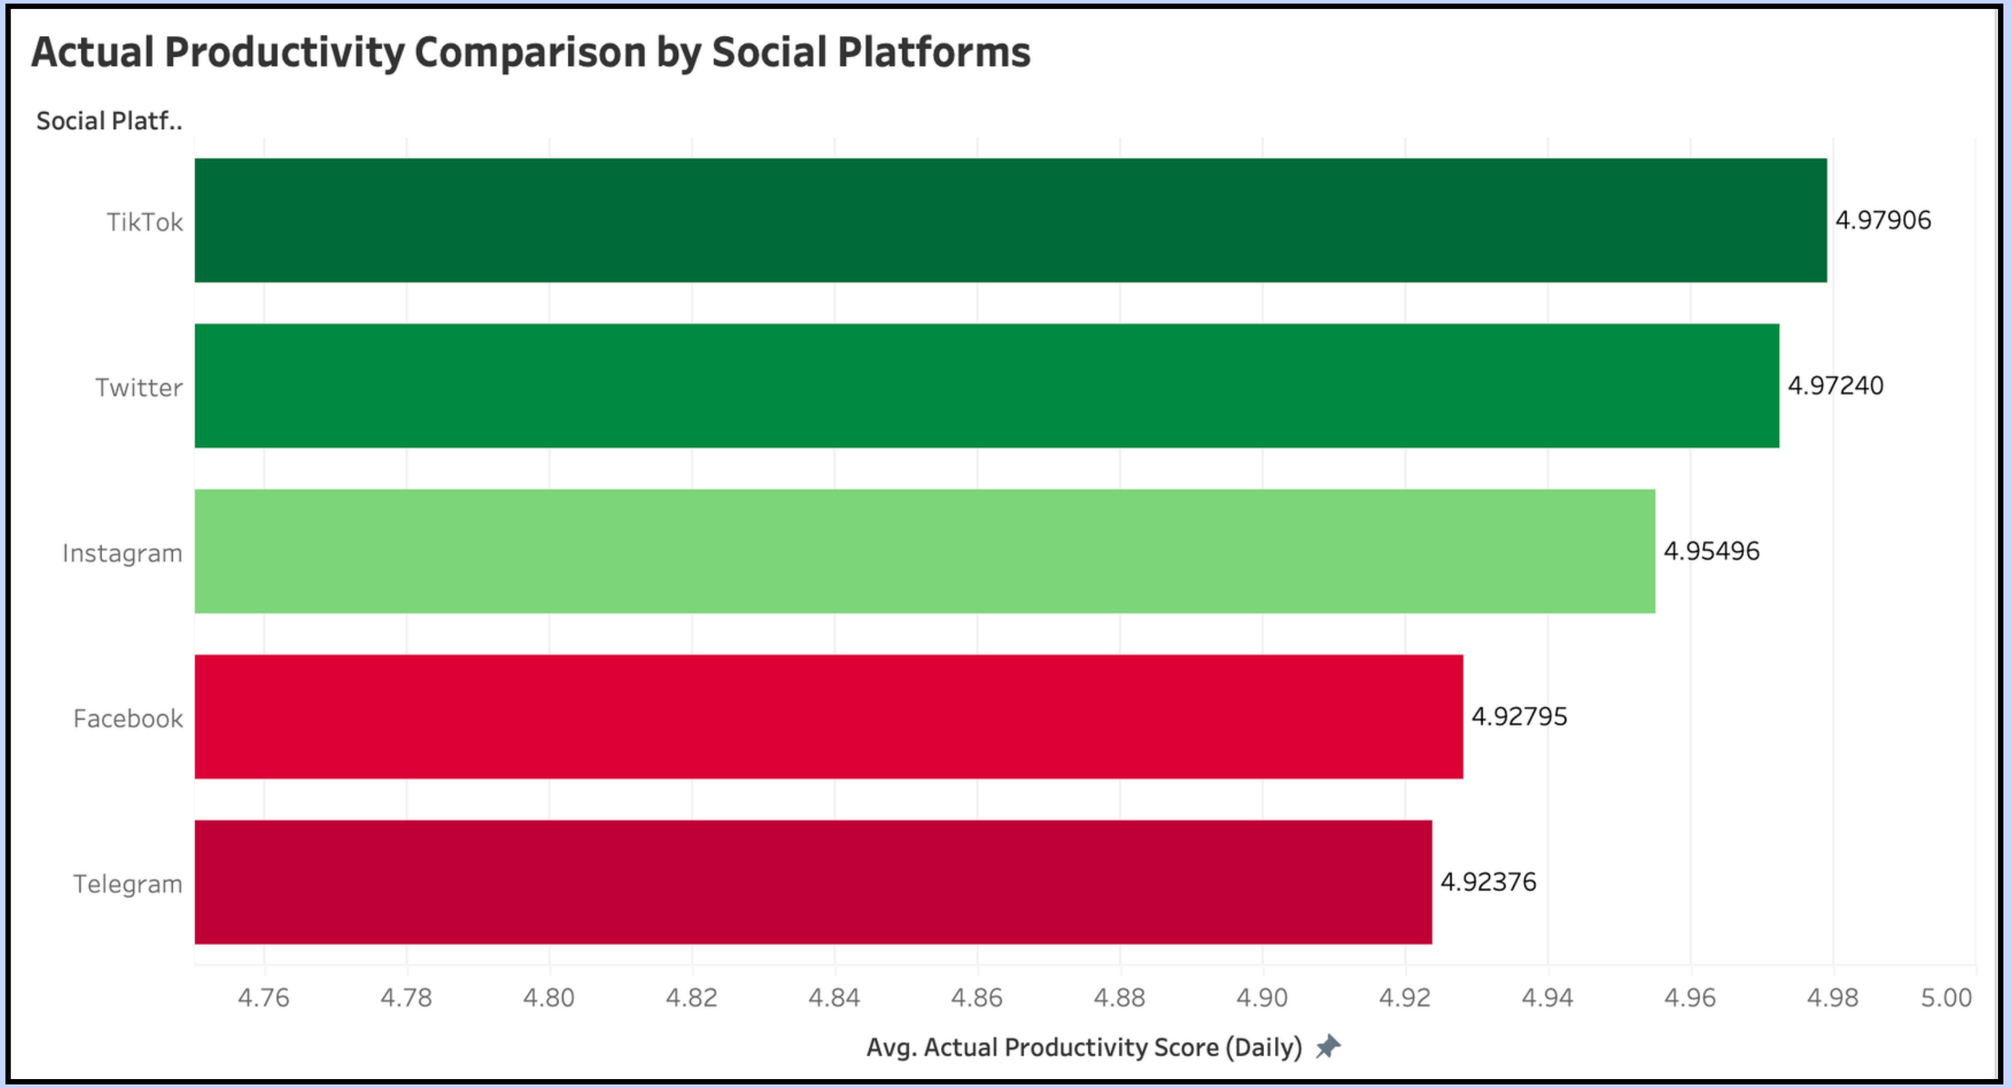

SCATTER PLOT

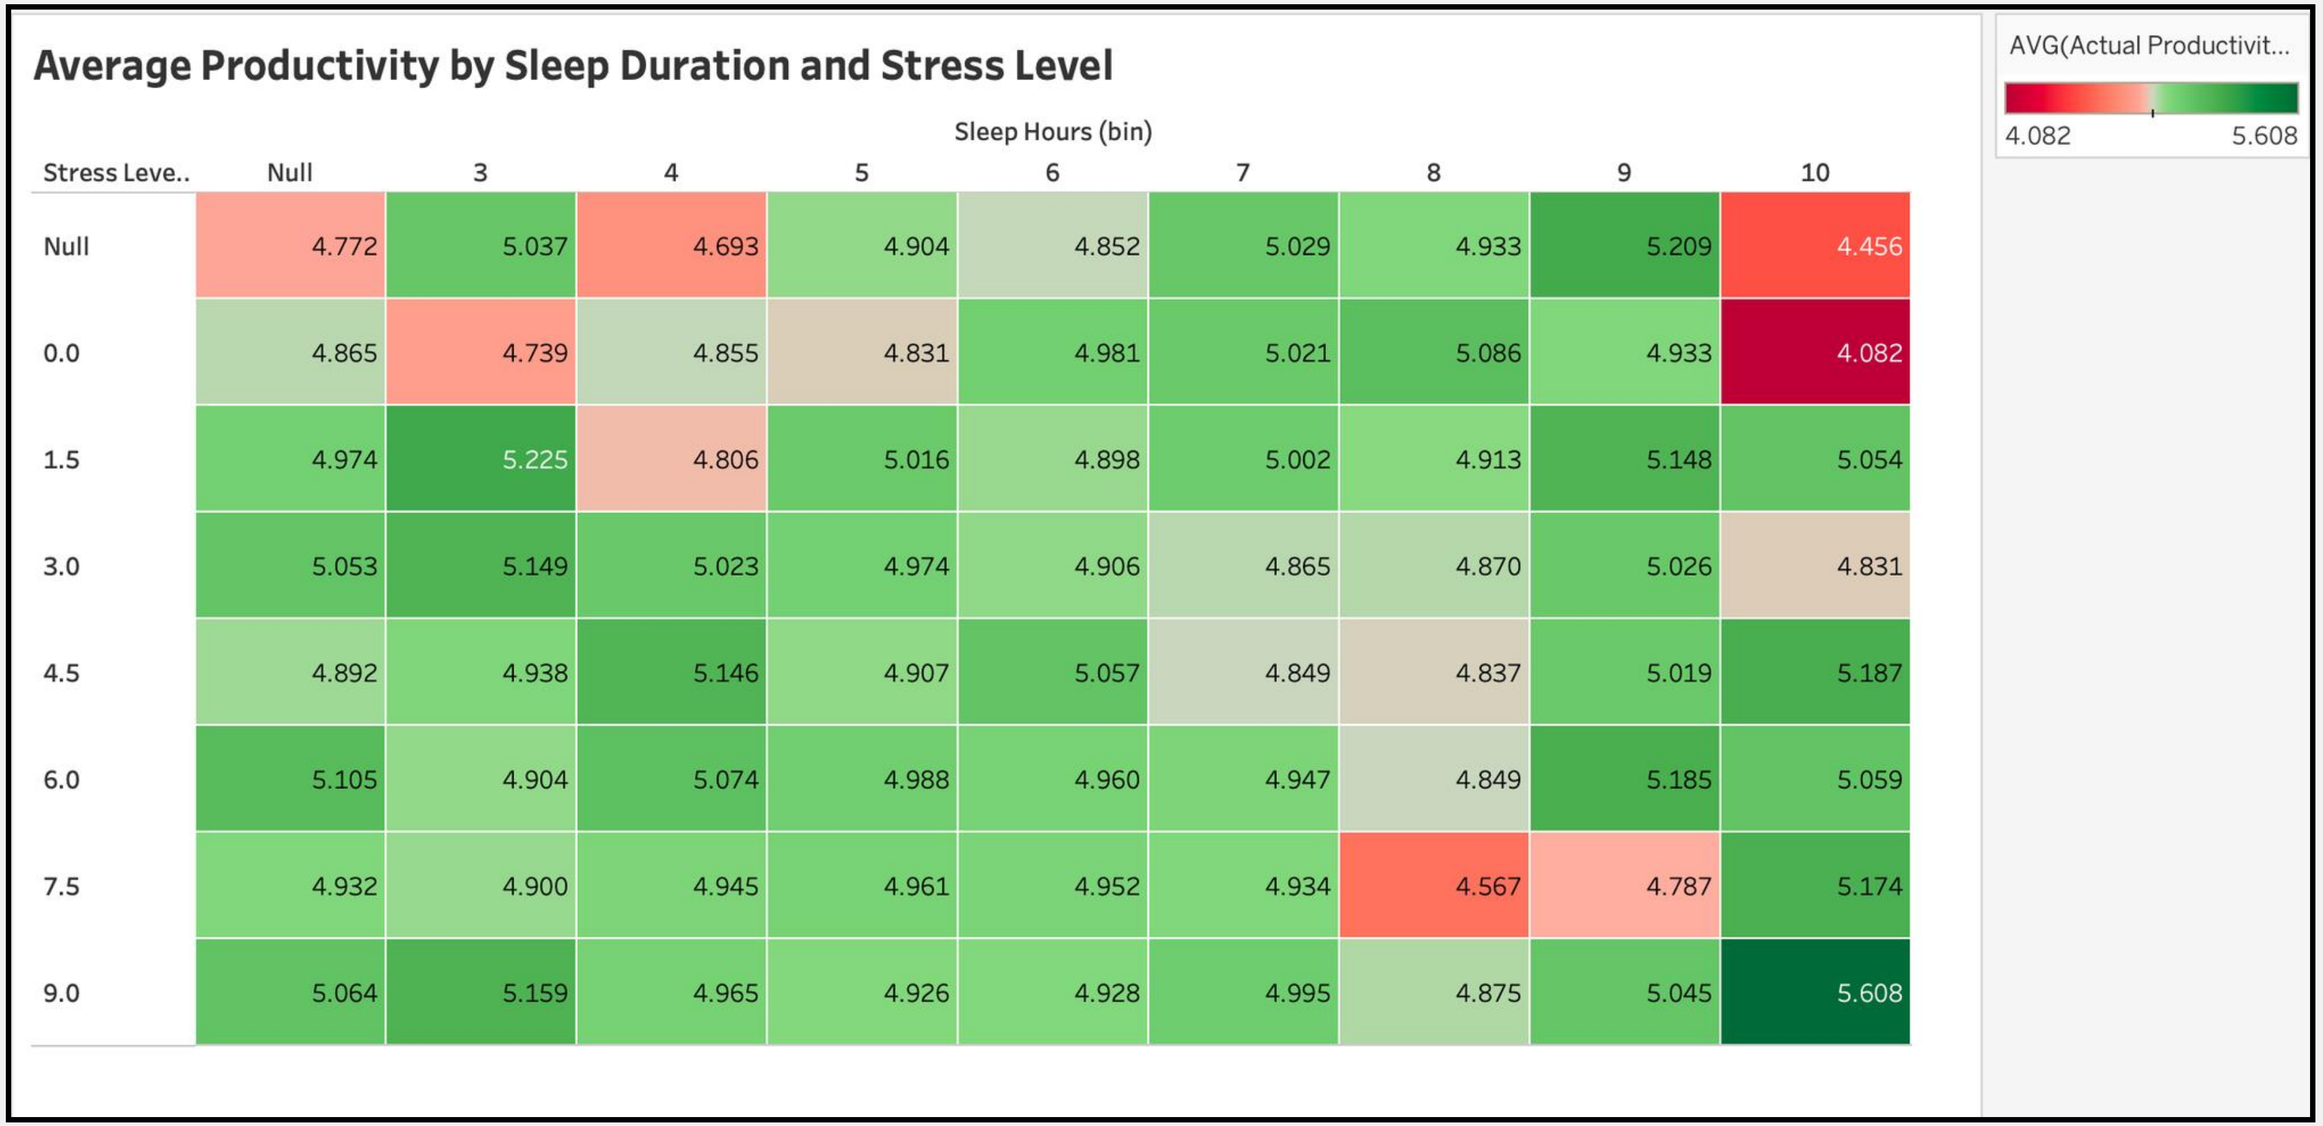

People tend to **overestimate** how productive they are

BAR CHART

The type of platform **matters less** than how we use it

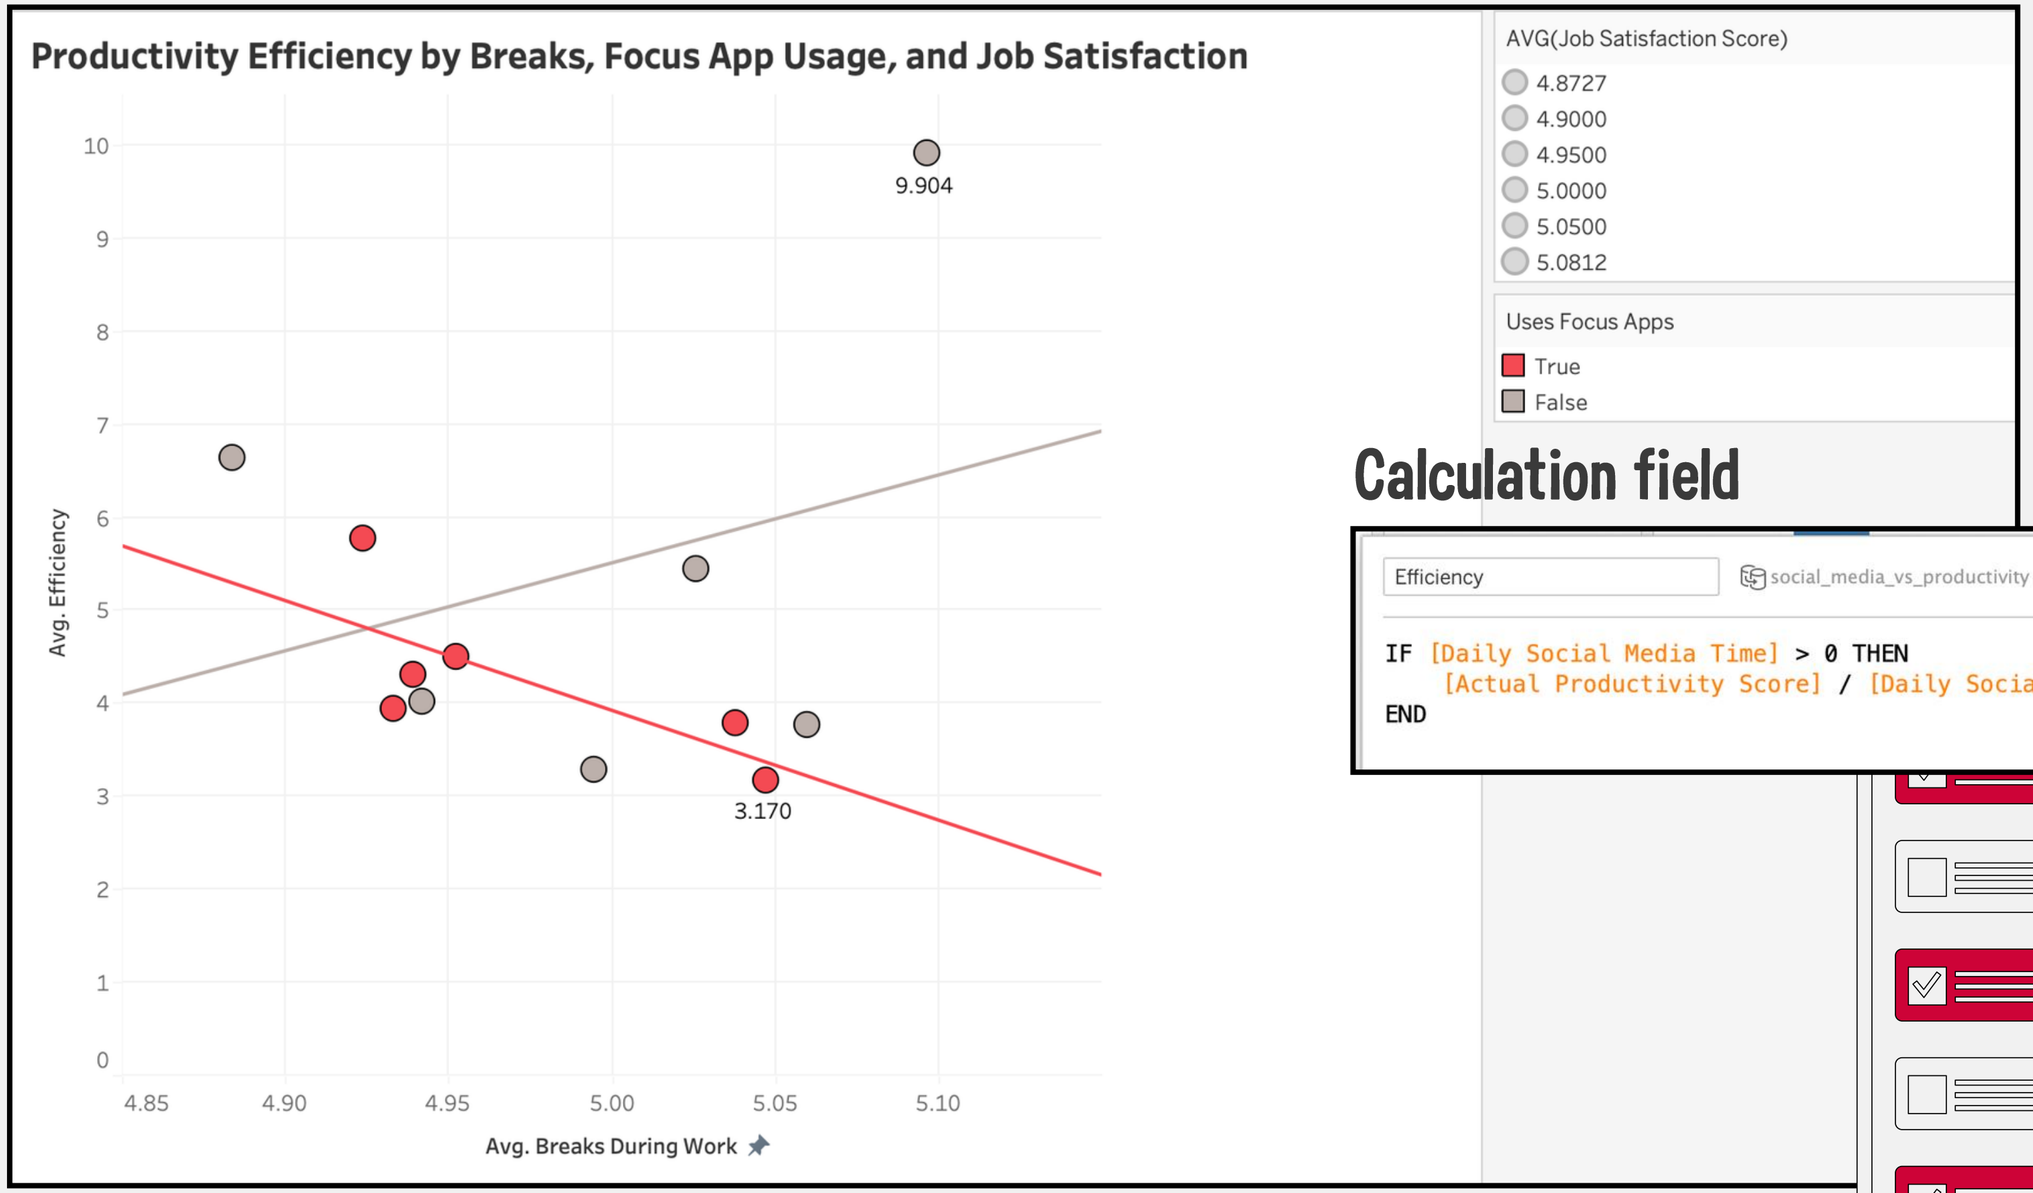

HEATMAP

Stress Leve..	Null	3	4	5	6	7	8	9	10
Null	4.772	5.037	4.693	4.904	4.852	5.029	4.933	5.209	4.456
0.0	4.865	4.739	4.855	4.831	4.981	5.021	5.086	4.933	4.082
1.5	4.974	5.225	4.806	5.016	4.898	5.002	4.913	5.148	5.054
3.0	5.053	5.149	5.023	4.974	4.906	4.865	4.870	5.026	4.831
4.5	4.892	4.938	5.146	4.907	5.057	4.849	4.837	5.019	5.187
6.0	5.105	4.904	5.074	4.988	4.960	4.947	4.849	5.185	5.059
7.5	4.932	4.900	4.945	4.961	4.952	4.934	4.567	4.787	5.174
9.0	5.064	5.159	4.965	4.926	4.928	4.995	4.875	5.045	5.608

There is an **interaction** between other variables

EFFICIENCY SCATTER PLOT

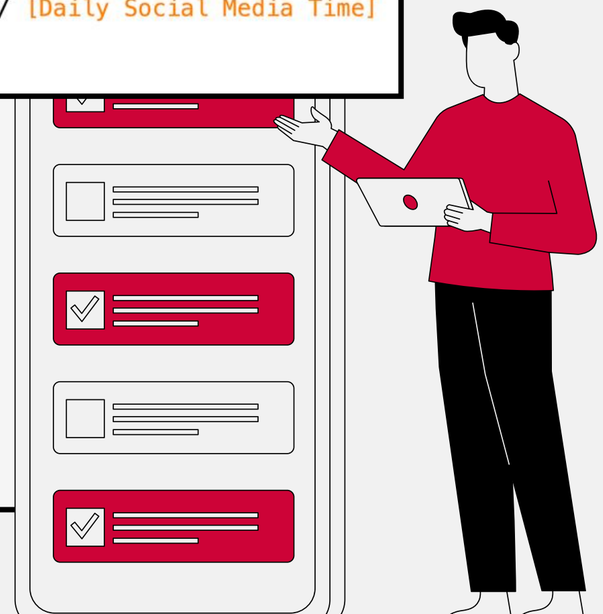

Calculation field

Efficiency

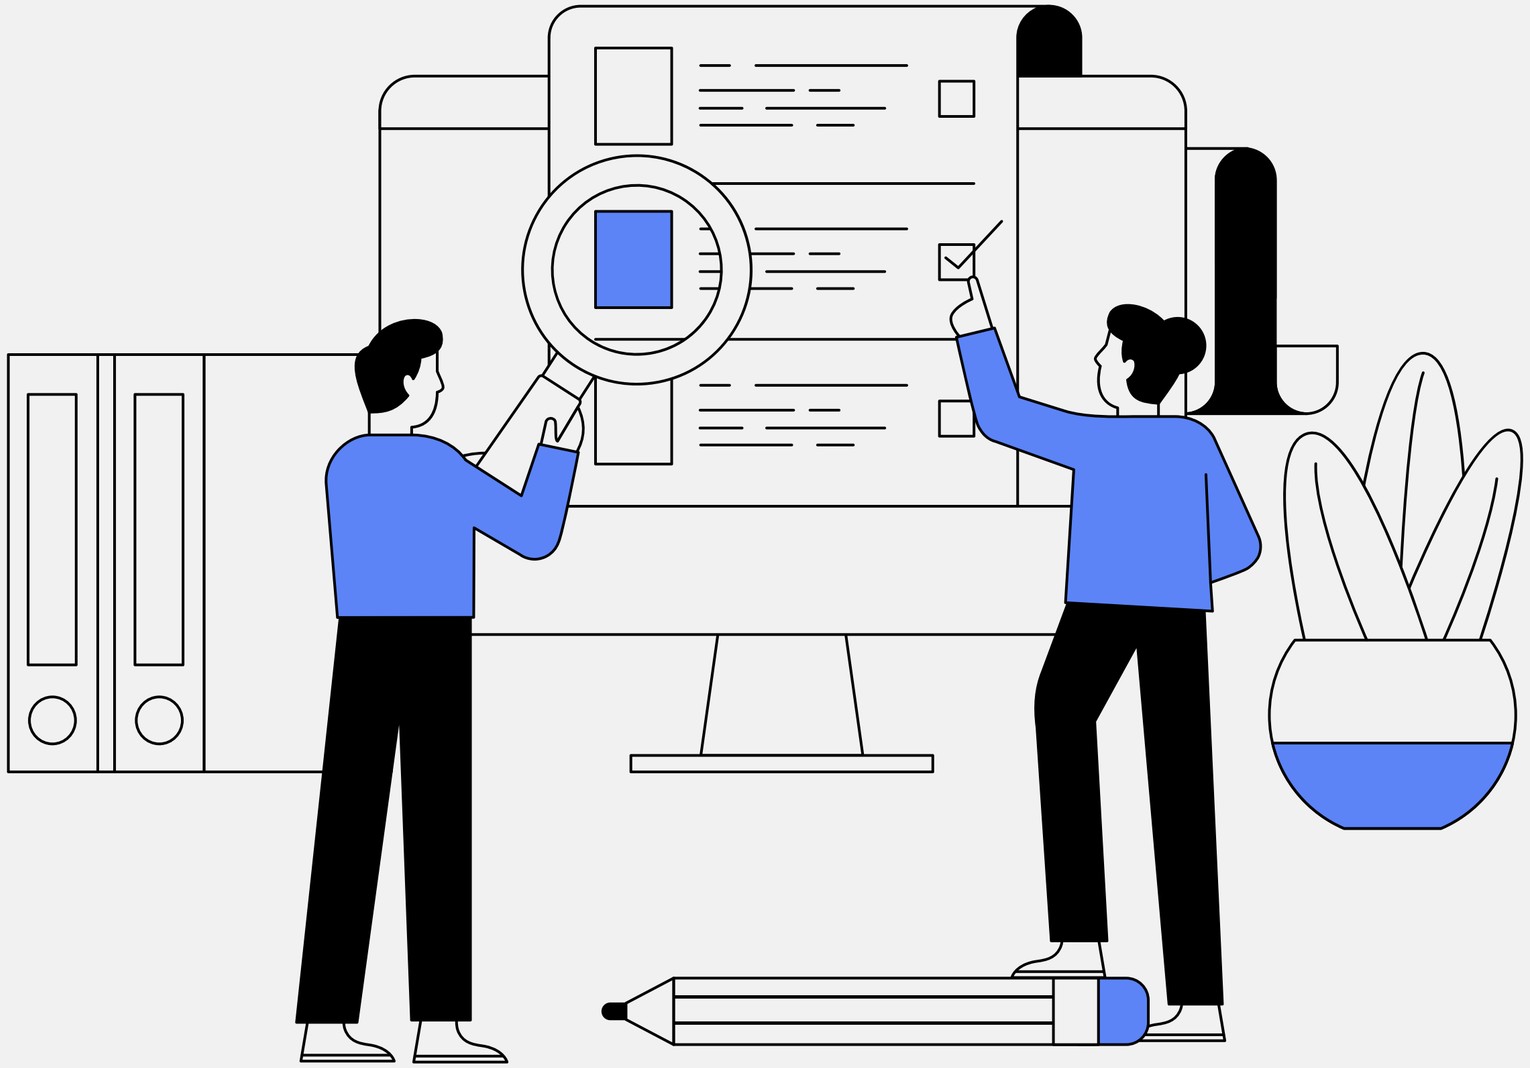

social_media_vs_productivity

```
IF [Daily Social Media Time] > 0 THEN
    [Actual Productivity Score] / [Daily Social Media Time]
END
```

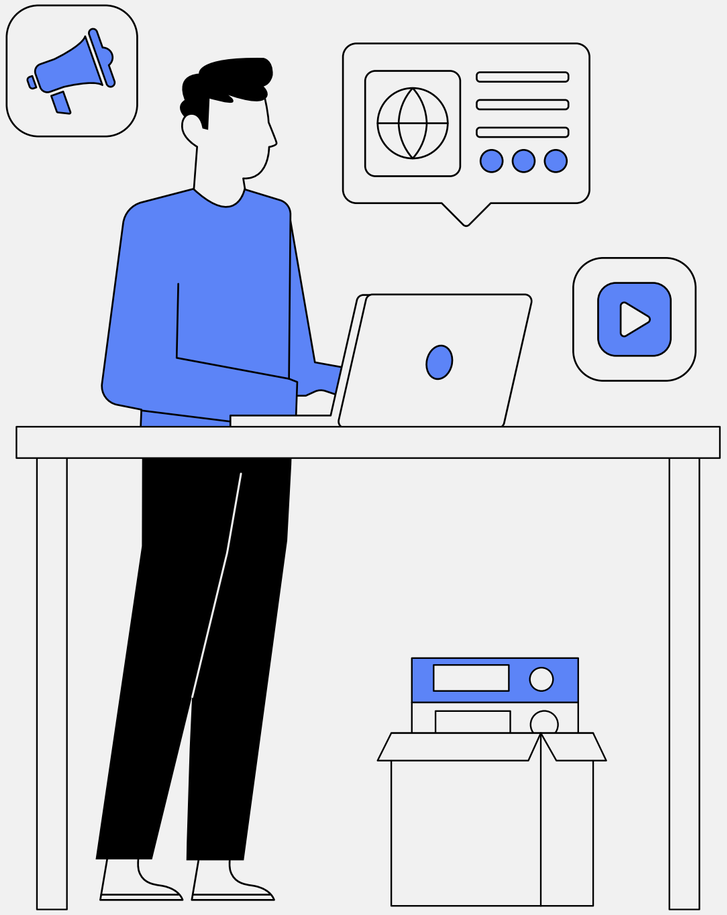

The more breaks people have during work, the less efficient are focus apps

WHAT DID WE LEARN?

About Dataset

📊 Social Media vs Productivity — Realistic Behavioral Dataset (30,000 Users)

This dataset explores how **daily digital habits** — including social media usage, screen time, and notification exposure — relate to individual **productivity, stress, and well-being**.

🔍 What's Inside?

The dataset contains **30,000 real-world-style records** simulating behavioral patterns of people with various jobs, social habits, and lifestyle choices. The goal is to understand how different **digital behaviors** correlate with **perceived and actual productivity**.
